

KATHERINE VARVAR

Ruther Glen, VA 22546 | (609)-610-8845 | [katherine.adjodha@gmail.com]
[www.linkedin.com/in/katherine-varvar] | [https://github.com/kvarvar]

Junior Web Developer

Detail-oriented, solutions-driven professional leveraging a strong background in IT enterprise software support, SQL databases, and data integrity to transition into web development. Active frontend development student skilled in building responsive user interfaces and optimizing system workflows. Adept at technical troubleshooting and cross-functional engineering collaboration.

Technical Skills

- **Frontend Development:** HTML5, CSS3 (Flexbox/Grid), JavaScript (ES6+ / In Progress)
- **Databases & Analytics:** Microsoft SQL Server, PowerBI, Excel Pivot Tables
- **Developer Tools & Systems:** Git, GitHub, VS Code, ERP System Integrations

Web Development Projects

[Project Name 1: e.g., Responsive Portfolio Website] |
[https://github.com/kvarvar/FinalProject-Module2]

- Designed and deployed a fully responsive, semantic HTML5 and CSS3 website optimized for mobile, tablet, and desktop viewports.
- Utilized CSS layout techniques (Flexbox/Grid) to ensure clean user interface components and cross-browser compatibility.
- Managed version control, branching, and project deployment pipelines utilizing **Git and GitHub**.

[Project Name 2: e.g., Interactive E-Commerce Landing Page] | [Link to GitHub / Live Demo]

- Built a dynamic front-end layout implementing clean, accessible UI design practices.
- [Add a bullet point here when you complete your first JavaScript project, e.g., *Integrated basic JavaScript functionality to handle dynamic user interactions and form validation.*]

Professional Experience

Dimora Brands / Top Knobs — *Application Specialist*

Feb 2023 – Present

- **Database Management:** Crafted complex SQL Server queries to extract critical data, ensuring maximum data integrity and supporting backend reporting pipelines.
- **Integration Workflows:** Managed and optimized ERP integration workflows with high-profile trading partners, including Williams-Sonoma and Men's Merchandise Corp.
- **Cross-Functional Collaboration:** Collaborated closely with IT analysts and internal teams to isolate software discrepancies, perform system clean-ups, and ensure overall database and application stability.
- **Testing & Validation:** Actively participated in system testing, transaction validation, and gathering user feedback to filter data and implement application upgrades.
- **Technical Documentation:** Maintained and updated comprehensive documentation for troubleshooting procedures, IT policies, and system architectures while training new employees on technical best practices.
- **System Optimization:** Monitored overall application performance metrics to proactively address potential system bottlenecks and minimize downtime.

Education & Certifications

Frontend Simplified — *Responsive Web Development & JavaScript Bootcamp*

2026 – Present

- Completing intensive engineering coursework focused on modern front-end methodologies, semantic HTML5, advanced CSS structures, and programming fundamentals in JavaScript (ES6+).

Additional Certifications:

- **Data Science Foundations Certificate**
- **SAS Programming Certification (4GL SAS)**
